The design and functional characteristics of the fireplace represent tradition and safety, as well as proven simplicity and economy.

It is made of gray cast iron and protected with black, thermally stable color.

The stove is free of rocket and ashtrays giving it a special quality - durability.

GLAS AMITY stove is made of high quality cast iron. The castings are embellished with relief ornaments and painted with black, heat resistant paint, giving a visually enhanced appearance to the product as a whole.

Large glazed door offers the view of the entire firebox and full experience of the open fire. The glass remains clean throughout the heating time. GLAS AMITY is distinguished by high efficiency and clean combustion.

The product has been designed and tested in accordance with European (EN) standards and has CE marking affixed to it.
