

STAR STOVES – MODEL ST 210 WOODSTOVE

ST210

Steel Wood Burning Stove

Wood Burning Stove made of 2,5 - 3,0 mm Steel equipped with tertiary combustion system (**Ecoburn2**), which inserts preheated air to the back side of the burning chamber and creates the conditions for secondary and tertiary combustion to take place, increasing the stove's efficiency, reducing wood consumption and lowering emissions. It also has adjustable primary and secondary air inlets. CE certified according to *EN 13240*.

Technical Specifications

- > Nominal Output: 12.1 KW
- > Efficiency: 79.7%
- > Dimensions (WxDxH): 47x37x80 cm
- > Weight: 53 Kg
- > Flue Pipe Diameter: Φ 12 cm
- > Firebox insulation: Vermiculite Board SF750
