## SAFETY

The regulations concerning fire(places) have been tightened the last few years. Safety for everything. Our Magic-Fires perfectly fit with these new regulations! There is no real fire and therefore no fire risk. Besides the Magic-Fires are CE-approved. Due to the vapour that will be released, the humidity in the room will increase which has a positive effect on one's health. In a nutshell: our Magic-Fires are not only safe, but they contribute to a healthy indoor climate as well!

In case you prefer a safe real fire, we refer to our bio-ethanol fireplaces: [www.safretti.com](http://www.safretti.com)

The greatest contrast in the world brought together by state of the art technique.

Magic-Fire®  
by safretti

Just add  
water...

Magic-Fire is an electrical fire and the captivating fire effect is created by illuminating extremely fine water mist. The burners are equipped with water reservoirs where the water is heated. The water then evaporates and by illuminating the mist you will get a truly realistic and lively smoke / flame effect.

Our Magic-Fire models have a unique design and a high-quality finish. A combination of exclusive design and the appearance of fire. The Magic-Fires are easy to install. A flue is not necessary. Due to the high-quality materials used, these Magic-Fires are suitable for use both inside and outside on the veranda or balcony. Safretti stands for Stylish, Modern, Trustworthy and Design.
